[Git hub.]

*) Git (Version control).

when we create new version project, may be that time New version Not work well, we will launch the old version.

*) Git → fruit and Github → fruit Mixer (Mixi)

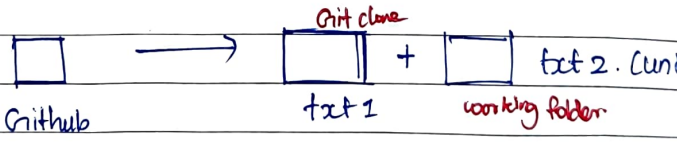
*) Commit Message. is important when we ~~[illegible]~~ Commit.

My Github
↳ My repo
↳ main (or) master (Branch).

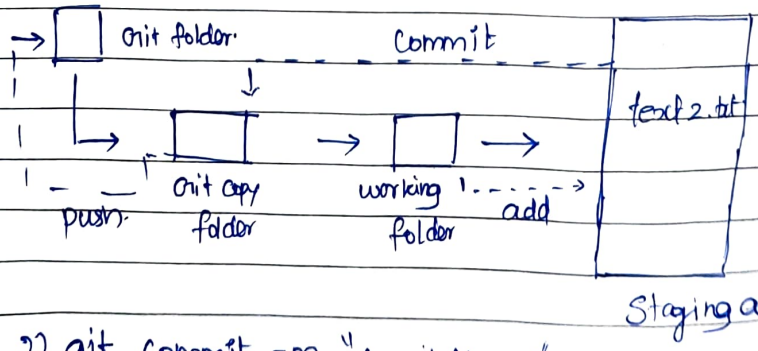
*) To clone :

1) git Clone (repo Link).
2) git Config user.name " "
git Config user.email " "

*) add file from cloned file



*) 1) git clone
2) git add

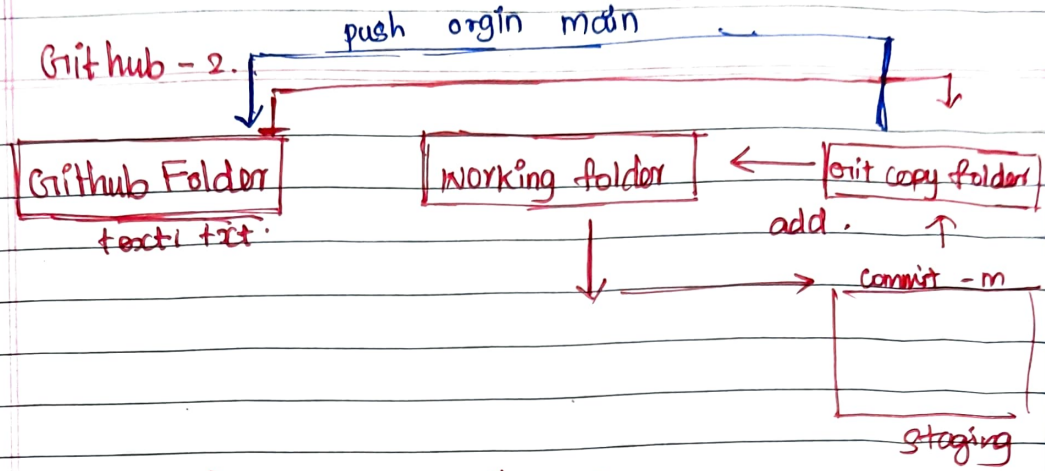


3) git commit -m "Commit Message"

4) git push origin main.

Insert → Add → Commit → push.

3 Grithub - 2.



4) upgrade file (pull). git pull.

5) git init
6) git remote add origin rep.origin.git.
7) git branch → main
→ master.

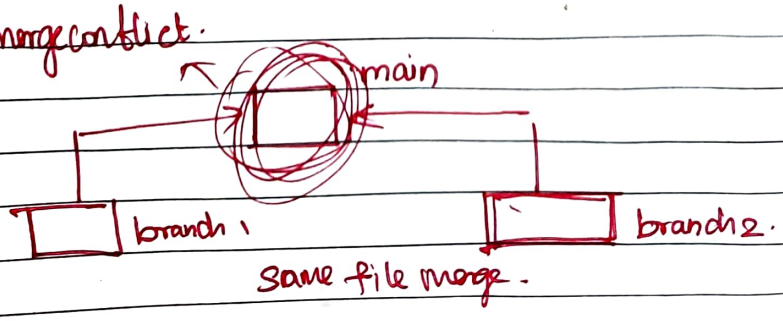
git branch.
git branch -M main.
git branch orgin main.

8) Branch

9 git branch -a
10) git ~~branch~~ checkout branchname.
11) git merge branchname.

13) pull request. → grithub request.

To create branch → git branch branchname.

14) Conflict.


1) mergeconflict.
